

S2.2 From Settlement Form to Power Distribution

Main map shows the 12 most repeated form-to-power pathways. Exhaustive matrix is in the _B figure.

Color = settlement form (matched by left-node strip). Line width = distinct settlement records.

Reading note: power sharing and concentration are classifications of settlement effects, not normative scores.

S2.2 Flow Figure - Settlement Examples

Examples preserve crisis and bargain IDs. Swatch color matches settlement form. Full source IDs are in T_S22_1, T_S22_3, and T_S22_9.
